"Sam Olens became Kennesaw State University's fourth president on Nov. 1, 2016.

Olens was elected Georgia's 53rd attorney general in 2010 and re-elected in 2014. In his role, Olens worked with the governor and legislature to strengthen the penalties for sex trafficking and protect the victims. He also guided a comprehensive revision of Georgia's sunshine laws and led the effort to stem the epidemic of prescription drug abuse. Additionally, in cooperation with the Georgia Food Bank Association and Young Lawyers Division of the State Bar of Georgia, Olens established the Georgia Legal Food Frenzy, which has collected the equivalent of over 5 million pounds of food for Georgia's youth.

LAST WEEK'S PROGRAM

August 7, 2017 Gary Black, Georgia Agriculture Commissioner

Georgia means farmer in Greek and it makes good sense, according to Georgia Agriculture Commissioner Gary Black who spoke to the Rotary Club of Sandy Springs on August 7, 2017. Commissioner Black gave the official Ag Report:

- Agriculture is the number 1 industry in Georgia worth \$74 billion, \$15 billion at the farm level and the rest value added;
- Georgia's top crops are peanuts, poultry, pecans and blueberries;
- Georgia is among the top three states for peach farming;
- Half of Georgia's pecans are exported to China;
- Dairy is growing in Georgia;
- The "Georgia Grown" brand is putting the spotlight on the quality of Georgia-produced foods and agriculture;
- Georgia's beef industry is growing;

School nutrition is another area that Georgia Grown is reaching into so that more Georgia Grown food is offered to schoolchildren. "A child that is hungry won't perform well", Black told the Rotary Club of Sandy Springs. Look to see more Georgia Grown logos on products in our supermarkets, including Kroger dairy.

Commissioner Black then brought out a length of string with bottle caps attached at regular intervals. He explained that this was agricultural technology in some countries, where seed are placed at the bottle caps and this action is repeated the length of the field. Black stressed that technology must improve worldwide as the population increases. Part of that process is educating people about farming. "The general public has a great appreciation for farming, more than for Congress, but we don't understand farming", said Black.
